G20 2016
China

2016 Hangzhou G20 Summit - Riverside Park - China

NVC LIGHTING - WORKING WITH YOU, WHEREVER YOU ARE

NVC is a lighting brand working with its customers around the world. Wherever we operate we have products for a wide range of commercial, industrial, residential and exterior applications that are suited to local market conditions. However, wherever we work there is one thing that is always the same - we aim to get as close to our customers as we can.

GOOD VALUE PRODUCTS, IN-STOCK LOCALLY

Very often a customer needs a small number of good value products today, for installation tomorrow. That might be batten fittings, panels, downlights or some low-wattage LED flood-lights for a residential project. We are there to help, with a network of local distributors carrying popular products in stock.

NVC Retail Store in Doha - Qatar

LIGHTING PROJECTS

Around the world we are best known as lighting suppliers for complete projects. Maybe our help is required to create just the right ambience in a new hotel, or a refurbishment project has ambitious targets to achieve for energy savings. Developers, architects and consultants come to NVC for just this sort of in-depth help and advice.

Typically, we will be able to supply lighting design services, advice on energy saving, local installation support - to make sure the contractor knows exactly how to install our products - and after-sales support with spares and repairs, if required.

2016 Hangzhou G20 Summit - China

COMPLETE LIGHTING SOLUTIONS

On most projects we can supply all the lighting that is required from our very wide range of standard products, but on some projects something special is required. A large 5-star hotel might require a custom-designed bedside lamp for each guest bedroom, or a special design of wall-bracket to match the theme the interior designers are creating. This is where we use the services of our own BERKELEY Division.

The BERKELEY Division consists of designers, engineers and material specialists all bursting with ideas to help turn a concept sketch from an architect, interior designer or lighting designer into a fully engineered and costed product. Using this approach we have created signature lighting fixtures for bars, restaurants and night-clubs as well as for hotels and shopping malls.

The capability of our BERKELEY Division is available to any client with whom we are already working, and the resulting product design is unique to that client - not replicated and put in a catalogue for general sale.

NVC - a vertically integrated family of companies

NVC - a family of companies, united to bring you the best available lighting technology.

Customers

Our sales & support network

- NVC Lighting Technology Corporation, Huizhou, China**
Our China Headquarters has 37 operation centres and 3,800 NVC-branded retail outlets in China.
- NVC Lighting Do Brasil Comercio, Importação E Exportação Ltda, Sao Paulo, Brazil**
Our Brazil regional office has a 3,940m² warehouse and an extensive showroom. We have a staff of 30, offering a wide range of lighting products and services tailored to local market requirements.
- NVC Lighting Middle East, Dubai, United Arab Emirates**
Our Middle East regional office supports our branch offices in Kuwait, Oman, Qatar, Saudi Arabia and the UAE.
- NVC Lighting & Electrical Technology (Singapore) Private Limited., Singapore**
Our SE Asian regional office supports our branch offices throughout Southeast Asia, East Europe, South America, Africa and CIS.
- NVC Lighting Ltd, Birmingham, UK**
Our UK regional office has over 100 staff and has annual sales of £32 million. The main markets served are the UK, Ireland and Scandinavia.

Lighting for commercial, industrial, retail, residential, amenity and exterior applications

ARCATEC

DRIVERS MADE BY NVC
NVC has its own factory in Shanghai dedicated to the design and manufacture of drivers. The Arcatec range of drivers is specifically designed to ENEC standards for European markets, but these drivers can also be specified in other markets if required.

Berkeley™

Berkeley is a specialist division of NVC providing a bespoke manufacturing service, usually for residential or decorative lighting.

ETI is the largest shareholder in NVC, and the 2nd largest LED chip manufacturer in China, with plants in Zhuhai, Dalian and Wuhan. Wherever it is appropriate we use ETI LEDs in our products.

THE LARGEST LIGHTING MANUFACTURER IN CHINA

NVC was founded in 1998 and is much more than just the largest lighting manufacturer in China, and one of the largest in the world. We are a family of vertically integrated companies that is unique in our field.

Our factories and R&D centres in China and the UK design and manufacture one of the widest ranges of lighting products of any company today. With such a broad range of commercial, industrial, retail, decorative and exterior lighting we can generally supply almost everything required on a large project.

In China we distribute our products through 37 Regional Operation Centres, supporting a total of some 3,800 NVC-branded retail outlets.

Around the world we have regional office, local offices and distributors supplying and supporting our customers in Europe, the Middle East, Asia and South America.

NVC is listed on the Hong Kong stock exchange and we have a global turnover (2017) of \$647 million. Our shareholders include Goldman Sachs (5%), Schneider (10%) and ETI (27%).

Berkeley™ A BESPOKE PRODUCT DESIGN AND MANUFACTURING SERVICE

BERKELEY is a division of NVC Lighting providing a bespoke design and manufacturing service. We deploy BERKELEY to support large projects where, for example, a 5-star hotel might require its own signature design of guest-room bedside lights in addition to standard NVC products being used elsewhere. It is the BERKELEY capability that enables us to say with confidence that we really can supply a complete lighting solution.

ARCATEC DRIVERS MADE BY NVC

We design and make our own drivers for many of the fittings in this catalogue. We have a specialist electronics factory in Shanghai manufacturing drivers to European (ENEC) and US (UL) standards for other leading brands - you would recognise their names.

On selected products we use the Arcatec range of drivers. This our own brand of high-performance, high-specification drivers, made in our Shanghai factory and especially suited to industrial applications. Wherever these are used we offer a 5 year warranty.

On most other product we offer NVC branded drivers, These provide excellent value, full compliance with the regulations for the market for which they are designed, and of course, they have the backing of your local NVC office, wherever you are. We make them - so we support them. Unless otherwise stated, products with an NVC-branded driver carry a 3 year warranty.

ETI ONE OF CHINA'S LARGEST LED MANUFACTURERS

ETI is listed on the Shenzhen stock exchange and has factories in Zhuhai, Wuhu and Dalian. ETI designs and manufactures wafers and packaged LEDs in many formats, including SMD and COB. Wherever possible we use ETI LEDs in our products.

Because of our very close relationship with ETI their LEDs are available to us on the shortest possible lead times. Our customers also benefit from having first-use of new products and access to a depth of product technical support and knowledge that few rivals can match.

ETI makes a wide range of LED devices, but when ETI's range does not include the precise product required we use other LED brands, especially Cree. We have a long-standing relationship with Cree stretching back many years, and our head office, with one of our R&D centres, is conveniently located close to one of Cree's factories.

NVC Manufacturing Plants

HUIZHOU

Area: 200,000m²
Employees: 3,000-3,500
Products: LED lamps, LED downlights, electronic transformers and outdoor lighting.

Huizhou, in Guangdong Province in the south of China, is NVC's worldwide headquarters. In addition to offices and luminaire manufacturing facilities it houses an LED packaging plant, one of our R&D centres and an international standard laboratory.

WANZHOU

Area: 170,000m²
Employees: 2,000-2,500
Products: LED panels, LED and fluorescent batters, LED, and CFL and PL downlights.

Wanzhou is in Chongqing in central China. Our factory here includes metal-working and painting facilities and produces a wide range of LED and fluorescent products for commercial applications.

JIANGSHAN

Area: 170,000m²
Employees: 1,200-1,500
Products: LED Lamps

Our Jiangshan factory used to be one of the largest fluorescent tube manufacturing plants in the world, but in the past two years it has been converted to the manufacture of LED lamps and LED tubes.

SHANGHAI QINGPU

Area: 8,200m²
Employees: 800-1,000
Products: LED driver+High-frequency control gear

Our Shanghai manufacturing plant supplies LED drivers and high-frequency control gear mostly to the North American market.

Research and Development

With sustained investment over more than 10 years NVC has established a product development infrastructure that has come to be a driving force behind the growth of the business. We have R&D centres in Jiangshan (Zhejiang), Shanghai and Huizhou (Guangdong) in China, and in Birmingham, UK., drawing on the expertise of universities in Tsinghua and Fudan, plus the Northwestern Polytechnical University and other colleges and institutions with particular skills in our field.

PRODUCT RANGE

NVC has set out to provide its customers with high quality complete solutions. With this in mind we have developed one of the broadest product ranges of any lighting company in the world, encompassing commercial, office, industrial, residential and exterior light fittings. In addition, we can offer supporting products and technologies including control gear, drivers and light sources, LED displays, cabling solutions, security systems and building controls.

Commercial lighting

NVC is a major supplier of lighting to the retail, hotel and amusement sectors. We are specified by many leading retail and hotel brands as their preferred lighting supplier.

Building illumination

NVC products are widely used both for flood lighting in stadiums and transport infrastructure, but also for highlighting the architectural features of prominent buildings.

Office lighting

Our range of office lighting products has been designed to deliver cost-effective and energy-efficient solutions that are visually appealing, minimize eye-fatigue and enable lighting designers to comply with the wide range of office lighting standards now in force world-wide.

Residential lighting

Our range of lighting for residential use reflects current trends in fashion and design.

Control gear, drivers and light sources

We have our own R&D facilities in which we design and develop a widening range of HF control gear, LED drivers and fluorescent and LED light sources.

Outdoor illumination

Sticking to the principle of "energy saving and environment protection", we take into consideration the urban construction style, geographic and cultural characteristics as well as the application scenarios while carrying out product design, development and production.

Industrial lighting

We have a comprehensive range of lighting products suitable for industrial, rough-service and hazardous area use, such as quarries, mines and petrochemical facilities.

LED displays

We are a "complete solution" provider of very large scale LED displays, as typically required for outdoor events such as sports competitions, concerts and other large events attracting massive crowds.

*Note: not all products are available in all markets.

Sports Facilities

2008 Beijing Olympic Games

In 2008 NVC played the leading role in lighting the Beijing Olympic Games. The areas we lit included the central area of the Olympic Games, the Olympic village, the National Convention Centre and the outside of the National Stadium. Of all the companies supplying lighting, NVC won the largest number and the highest value of contracts and supplied lighting for the widest range of applications.

Between them, the lighting products we developed for the 2008 Beijing Olympics have been granted 13 patents, and one range of outdoor lighting fixtures was awarded the China Red Star Design Award - Gold medal.

2010 Guangzhou Asian Games

In 1990 the Asian Games were held in Beijing, allowing the world to see something of the emerging energy of modern China. 20 years later, in 2010, the Asian Games returned to China, this time to the city of Guangzhou. NVC was appointed as Official Lighting Supplier to the 16th Asian Games and provided the lighting for the athletes' village, the media village, the gymnasium, the velodrome and many of the supporting facilities. On each project special attention was paid to ensuring the highest possible levels of energy efficiency.

Velodrome

Media Village

Racing & Equestrian Club - Qatar

Thanks to the state-of-the-art facilities, Qatar Racing and Equestrian Club (QREC) is one of the best known horse training centers in the world. Racing events take place every Wednesday and Thursday from October to May with nearly 60 race days held annually.

Racing & Equestrian Club - Qatar

NVC supplied a range of suitable light fittings for almost every area at the QREC. The main areas to be lit included the gardens at the entrance to the club, the tunnel leading from the stables to the race track, the high walls surrounding parts of the club and the facades of the main buildings, such as the quarantine centre and the equestrian swimming pool.

Jebel Sifah Hotel - Oman

The complex covers 65 hectares and is still expanding. NVC has provided thousands of buried up-lights, garden lights and other external lighting fixtures for the villas and sea-front areas.

Shangri-La Hotel - Indonesia

Top five - star hotel in Jakarta, NVC supplied lighting fixtures for restaurants, clubs and gardens.

Mandarin Oriental Hotel - Indonesia
Famous five - star hotel in Jakarta

RTCC - Six Towers - Khobar - Saudi Arabia

NVC provided a range of exterior and interior lighting for the six residential towers next to the Al Rashid mall, which is one of the most significant projects owned by RTCC.

Azadi Hotel - Iran

Yadegare-Imam Cross Road, Chamran Highway, Tehran, Iran

Swissbel Inn Solo Hotel - Indonesia
Jalan Slamet Riyadi, Solo, Indonesia

IBIS Hotel - Indonesia

Sunter, Jakarta, Indonesia

IBIS is an international hotel company owned by Accor Hotels. It has over 950 hotels in 55 countries around the world with over 380 in France and most of the remainder in Europe. The hotels are generally close to city centers, airports and rail stations offering budget rates. In 2013, Ibis became the largest hotel brand in Europe.

Hormuz Grand - Oman

P.O. Box: 154, Azaiba, PC: 130, Sultanate of Oman

An imposing five-star project near Seeb's Airport Heights in Oman.

Sun & Moon Hotel - Cambodia

Modern hotel located in the vibrant heart of Phnom Penh, Cambodia.

Plage Hotel -Kuwait

Located in Salamiya district, The Plage is one of Kuwait's best 5* hotels, enjoying far-reaching sea views. We provided most of the interior functional lighting for the whole hotel.

Marbella Hotel - Saudi Arabia
Four - star hotel located in Dahrnan, Saudi Arabia

The St Regis hotel, Al Habtoor City - Dubai

NVC supplied all the interior functional lighting and all the decorative lighting in the guest rooms, suites and guest corridors. All the decorative lighting was manufactured to the lighting designer's own specifications and is therefore unique to this particular hotel.

The Al Habtoor Polo Resort and Club

The resort consists of a 5* luxury hotel, 145 villas for rent and four polo grounds with the associated stables and other facilities.

For such a special development the lighting had to be special too and NVC is proud to have supplied almost all the lighting for the hotel and the luxury villas. This included the decorative and functional lighting for all the public areas, guest corridors and guest bedrooms and some outdoor lighting too. However, no description of the lighting would be complete without giving a special mention to the equestrian chandeliers supplied by NVC.

Alongside the equestrian chandeliers we also provided several other custom-made light fixtures to complete the south-American/Spanish theme that U+A had stipulated.

Completed spring 2017

Client: Al Habtoor Group

Main consultant: Atkins

Interior designers: U+A

Main contractor: Parkway International Contracting

The Westin, Al Habtoor City - Dubai

NVC supplied all the functional and decorative lighting in the guest rooms, suites and guest corridors. This included numerous pendant fittings, wall brackets and several equestrian themed chandeliers, one of which is featured here. These were all supplied by NVC to designs by Maurice Brill Lighting Design Ltd in London.

Lighting design consultants - Maurice Brill Lighting Design Ltd, London
Main contractor - HLG, Dubai

The W hotel, Al Habtoor City - Dubai

All decorative and functional lighting in the guest rooms, suites and guest corridors.

Lighting design consultants - Maurice Brill Lighting Design Ltd, London
Main contractor - HLG, Dubai

Blue Salon - Qatar

For over 30 years, Blue Salon has been Qatar's leader in fashion, jewelry, perfumes, cosmetics, home décor & travel gear. NVC has been providing lighting to Blue Salon for more than 3 years in an on-going programme of replacement and refurbishment.

CHILAI Furniture Store - Vietnam
No.30 Nguyen Van Troi Street, 17 Square, Phu Nhuan,
Ho Chi Minh City, Vietnam

FNAC Bookstore - Qatar

The Fnac Group is pursuing its international expansion with the opening of a new franchise store in Doha, Qatar, in partnership with Darwish Holding, a pioneer in mass distribution and retail sales in the Middle East. This partnership allows the brand to benefit from the full expertise of Darwish Holding in both the franchising industry and the distribution of technical products. NVC has provided a large quantity of lighting track and light fittings.

Saraiva - Brazil

Established in 1914, Saraiva has become the largest chain store in Sao Paulo, Brazil, in market share has reached about 20%.
